

Annual Report 2019/2020

Area Wide Grant (AWG)

and

Member Awarded Funding (MAF)

Foreword

As the appointed Executive Member for Communities, and as the portfolio holder for Environment and Communities, I am pleased to be writing the foreword for the combined annual report for the Area Wide Grant (AWG) and Member Awarded Funding (MAF) schemes for 2019/20. The Council is committed to empowering its communities and through the availability of schemes such as these this is one way it can be achieved.

These schemes have now been running for a number of years and during this time over 800 projects have been supported in South Gloucestershire. As ever, projects are varied but all have a shared aim to ensure that South Gloucestershire is a great place to live and work.

Not only does this annual report provide an account of the grant expenditure, it also demonstrates that the schemes are compliant with the original resolution and that the Council's constitution and legal obligations are upheld, including those under the Transparency Code 2015.

Periods of purdah during this year up to local elections in May and the General Election in December meant that the activity of Members in the scheme was curtailed. Never the less, 100% of the budget was allocated to local community projects.

Following the outbreak of COVID-19 it was swiftly resolved to amend the MAF process in the latter half of March 2020 to enable the newly emerging Mutual Aid Groups to access our funding resource. Our next Annual Grant Report will give a full account on the outcome of this and the additional VE Day Grant which opened in March 2020.

To end, I hope you find this annual report informative and that you may even be inspired to apply to one of our programmes.

Signed:

Cllr Rachael Hunt, December 2020
Executive Member for Communities

Background

1 The Area Wide Grant (AWG) scheme specifically supports projects providing benefits across a significantly wider geographic area than Member Awarded Funding (MAF) which enables Members to support organisations in their local ward area.

2 Town and Parish councils (TPC), and voluntary, community and social enterprise (VCSE) organisations are eligible to apply for both schemes. In support of this, a number of basic principles have been agreed for the [AWG](#) and [MAF](#) schemes to provide a transparent, accountable, consistent and legal process to be adhered to.

3 As previously agreed, the AWG budget was £70,000. Due to elections in May 2019, the MAF budget reflected the number of elected Councillors, thereby upholding the agreed principles of the scheme and giving a total of £183,000 to award. The total grant budget was £253,000 and 100% was awarded. *(all figures in this report are rounded to the nearest £).*

Analysis of Grant funding

4 The AWG budget of £70,000 was applied over two funding rounds in 2019/2020 as originally determined and in accordance with the principles of the scheme.

- 43 AWG applications were received
- 43 AWG awards were made
- 100% of the AWG budget was committed
- 74% of successful applications supported residents from our protected characteristic communities
- 98% of the awards were made to VCSE organisations
- AWG supported projects totalling £428,120
- AWG awards were 60% of that requested.

5 MAF data was assessed in accord with the available amount £183,000. Key findings for the year included:

- 160 MAF applications were received
- 155 MAF applications were successful
- 138 VCSE, 14 TPC and 3 additional public service projects were supported
- 100% of the MAF budget was committed
- 86% of the awards were made to VCSE organisations; 8% to T/PC and 5% to public services
- MAF supported projects totalling a value of £1,363,028 of which MAF awards were 78% of the amount requested.
- The largest award to a single project was £10,623.84 towards the Mission Costs of Great Western Air Ambulance, which was the Chair's Charity 19/20.

6 A number of organisations applied to both the MAF and Area Wide Grant (AWG) grant schemes on more than one occasion, for different or the same projects. 19 organisations applied to both the MAF and AWG schemes; 5 received MAF and AWG awards for the same project; 19 received MAF awards for more than one project and 1 received AWG awards for more than one project.

7 The amount of funding brought into the area from non-council sources or by fund raising activities by applicants totalled £1,481,663 meaning that for every £1 provided by the council over £5.86 was generated from other sources for South Gloucestershire.

Supporting the Council Plan 2016/20

8 The Council Plan 2016/20 outlines the Council's priorities which underpin the direction of the Council. Strategic outcomes are set out under the headings People, Place and Resources.

9 Combining the grant awards from both schemes for 2019/20, VCSE organisations and town or parish councils (TPC) provided projects and services to their local communities which directly contribute to and invest into the Council's priorities, as shown below:

- People, £156,977, relative investment value 62%
- Place, £89,590; relative investment value 35%
- Resources, £6,434; relative investment value 3%.

10 Analysis of projects by category demonstrated that projects supporting *Children and young people* received the greatest amount of investment of £39,353. Applications included projects to youth groups for activities or to improve facilities or outdoor spaces specifically for children and young people.

11 Health and Wellbeing was the second highest category receiving grant investment of £ 35,062. This category covers a varied range of applications including sports clubs improving their facilities to encourage healthy lifestyles, wellbeing projects and projects to reduce isolation, including community transport.

12 *Enhancing the built environment* applications received grant investment of £34,020; the most common being improvements to village halls and community centres which benefit all users.

13 *Parks and open spaces* projects were awarded £33,231. The majority of funding in this category supported improvements to parks and open spaces and conservation and biodiversity projects were also supported through this strand.

14 *Advocacy and Advice*, £22,810; this category supported a range of projects covering topics such as debt advice, sustainability and voluntary sector support.

15 *Community safety projects*, £20,883. This category included the largest award of £10,623.84 to Great Western Air Ambulance for their emergency work across the area.

16 *Events, heritage and arts projects* received £19,945. The category supported a large number of community festivals across South Gloucestershire as well as improvements to heritage assets. All projects upheld the overarching aim to draw visitors and residents to South Gloucestershire.

17 The remaining categories were awarded the following amounts:

- Projects for disabled people, £18,260
- Education and learning activities, £11,174
- BAME Projects, £7,500
- Projects for older people, £3,990

- COVID specific projects, £3,529
- VE day projects, £3,240.

Further category analysis can be viewed in *Appendix 1* to this report.

Monitoring of awards made in 2018/19

18 The monitoring return rate for 2018/19 for organisations receiving Area Wide Grants (AWG) funding was 88%; for Member Awarded Funding (MAF) it was 92%. Further monitoring details can be viewed in *Appendix 2* to this report.

19 When organisations were asked to report if their projects had been completed within 12 months in accordance with the grant terms and conditions, 82% of AWG and 94% of MAF applicants answered positively. Analysis of the reasons for non-completion within this time frame showed that factors beyond the control of the organisation can impact on service delivery, and reasons ranged from weather conditions, staff issues to delays in permissions being granted. All projects were followed up and monitoring extensions have been agreed when required to ensure that the award is spent in full and as planned.

20 The value of volunteers in the voluntary, community and social enterprise sector (VCSE) is significant as organisations rely on volunteering hours to help run services and activities. A total of 1,911 volunteers participated in the provision of funded projects. Organisations reporting not to have used volunteers for project delivery engaged professionals due to the nature of the work.

21 The approximate number of South Gloucestershire residents benefiting from funded services and activities in both schemes was 270,986, which equates to an investment by the Council of almost £1 per project beneficiary.

Equalities

22 The Grants service is committed to ensuring that it is operating fairly and equitably in all areas of delivery.

23 Equality monitoring is undertaken to ensure that the service is accessible and open to all organisations. Likewise, organisations are required to demonstrate in their application their commitment to the provision of equal opportunity, in their project and this is ratified by Members in their authorisation. A comprehensive list of awards supporting our protected characteristic communities can be viewed in *Appendix 3* to this report.

24 To ensure equality commitments are upheld, organisations are asked to complete an equality survey. Questions are designed to ascertain if an organisation's primary function is to support individuals on the basis of their protected characteristic.

25 Organisations are also asked about the composition of their management committee and whether or not the majority identify with one or more of the nine protected characteristics to establish representation.

26 The table in *Appendix 2* to this report illustrates responses received. Applicants could select more than one characteristic, to take into account of people with intersectional identities.

The Local Government Transparency Code

27 As part of South Gloucestershire Council's obligations under the Local Government Transparency Code 2015, all grant decisions and payments have been published since 2014. The data includes previous funds of Community Grants, Positive Activities Subsidy (PAS) and New Homes Bonus (NHB); and current schemes of Three Year Grants, Financial Inclusion Service (welfare benefit and debt advice), Member Awarded Funding (MAF) and Area Wide Grants (AWG). Payments can be viewed on the [Open Data webpage](#) accessible from the [MAF webpage](#).

Conclusion

28 The Council's grant programmes continue to benefit South Gloucestershire communities in a number of ways:

-  The MAF scheme has enabled Members to support organisations working in their local wards, to meet local community needs
-  The responsiveness of the scheme has allowed Members to see direct benefits to residents in their wards within a short time-frame
-  The grant schemes have highlighted the importance and extent of charitable and community work taking place in South Gloucestershire communities, making it a great place to live and work
-  The grant schemes have supported cross-party and interparty collaborations to pool funding to support projects requiring greater investment
-  Under the MAF scheme Members have adopted innovative processes to administer their funding within the set principles and processes of the programme which has enabled organisations to access funds when they need it
-  Organisations supporting communities with protected characteristics benefited from the AWG scheme ensuring that they were not excluded on the grounds of geographical area or protected characteristic
-  Grant funding has a positive impact on the Council's priorities.

Appendices

- Appendix 1 Grants analysis 2019/20
- Appendix 2 Grants monitoring 2018/19
- Appendix 3 Grant awards 2019/20

Grants Analysis 2019/20

Area Wide Grants (AWG)

- 1 In the following analysis comparisons are only made between AWG 2018/19 and 2019/20.
- 2 A total of 43 applications was processed in 2019/20 requesting £116,273. All applications were successful and 100% of the AWG budget of £70,000 was committed. This was similar to 2018/19 when 43 applications requesting £121,181 were processed.
- 3 In the first funding round, 27 applications were received, requesting £65,063. All were awarded funding and this totalled £35,644.
- 4 In the second funding round 16 applications were received requesting £51,210. All were awarded funding and this totalled £35,356.
- 5 The average request for AWG was £2,704 and the average award was £1,628 which equates to 60% of the average funding request (2018/19, average request for was £2,818 and the average award was £2,000).
- 6 Principle 3.2 provides guidance on the level of funding with the maximum level of award suggested as £3,000, with flexibility for both exceptional circumstances and budget availability. Of the 43 AWG applications, 17 requested over £3,000 but were only considered eligible for the maximum recommended AWG award due to budget availability.
- 7 The majority of applications (74%) supported residents with protected characteristics. These included projects that supported children and young people with Special Educational Needs and Disability (SEND) and projects for older people with the aim of reducing loneliness and isolation.
- 8 The voluntary, community and social enterprise (VCSE) sector is more likely to receive an AWG award due to its ability to work across a wider geographic area than Town and Parish Councils (TPC) whose spend is restricted to the civil parish boundary. One application was received from a Parish Council co-operating with other TPCs.

Member Awarded Funding (MAF)

- 9 In the following analysis, comparisons between funding years are made but it should be recognised that, due to ward boundary changes, the MAF 2019/20 budget was £183,000 whereas in previous years it was £210,000.
- 10 A total of 160 MAF applications was received, requesting £234,179 (previous years; 172 in 2018/19, requesting £300,869; 193 applications in 2017/18 and 2016/17 requesting £328,162 and £250,341 respectively).
- 11 The number of successful applications was 155. Five were unsuccessful, compared with three in 2018/19; four in 2017/18 and six in 2016/17. The most

commonplace justification for £0 funding was “Member’s budget was committed in full” or applications were “not compliant with MAF Principles”.

12 Of the 155 projects that were awarded funding in 2019/20:

-  8 Town or Parish Councils (TPC) applied for 14 projects, which received £14,890;
-  124 voluntary, community and social enterprise (VCSE) organisations applied for 143 projects, which received £158,356;
-  3 applications were for additional levels of localised public sector services, which were awarded £9,754.

13 The average request for MAF was £1,463 and for the 155 awards made, the average award was £1,180 or 78% of the amount requested.

14 The average award value for the year of £1,180 was less than that in 2018/19 (£1,272) but greater than in previous years (£1,090 in 2017/18, and £1,079 in 2016/17)

15 At financial year end (March 2020), 100% of the Member Awarded Funding (MAF) budget had been committed.

16 At year end an accrual of £62,550 was made so that grants could be paid once organisations had completed their grants online registration, or met other funding conditions. The accrued amount for 2018/19 was considerably smaller (£19,368) due to most organisations being prompt to register online to meet funding conditions.

17 The number of awards to VCSE organisations fell slightly to 138 (143 in 2018/19; 171 in 2017/18; 173 in 2016/17).

18 The number of projects delivered by TPC was 8; funds applied were £14,890 (2018/19, £19,800; 2017/18, £20,850; 2016/17, £13,535).

19 Members can use MAF in a number of ways; the preference is for MAF to be used “as a non-recurring grant”.

20 Only three awards were made for additional levels of localised public sector services but funding increased to £9,574 (2018/19, £6,025; 2017/18, £4,375)

21 During 2019/20, Members collaborated to fund many projects and 8 projects benefitted from Members pooling their budgets to create awards over £3,000, the largest single award being £10,624. In the previous year, 10 projects received over £3,000 and the largest single award was £14,387.

Supporting the Council Plan 2016/20

21 The majority of applications supported the Council’s Strategic Priorities under People and the percentage distribution of funding was similar to the previous year. It should be noted that organisations could select more than one Strategic Priority in their application.

Strategic Priorities	People	Place	Resources
Number of applications	138	78	11

Relative level of investment	£156,977 (62%)	£89,590 (35%)	£6,432 (3%)
------------------------------	-------------------	------------------	----------------

22 Analysis of investment by project category showed that projects supporting children and young people received the greatest amount of funding (15.56%), followed by health and wellbeing (13.86%); enhancing the built environment (13.45%) and parks, open spaces and conservation (13.14%). The table below shows the budget breakdown by category:

Categories	MAF £	AWG £	Total £	No. MAF projects	No. AWG projects	Total No. projects
Children and Young People	35853	3500	39353	26	1	27
Health and wellbeing projects	23204	11858	35062	19	6	25
Enhancing the built environment	27520	6500	34020	22	4	26
Parks, open spaces and conservation	20811	12421	33232	25	7	32
Advocacy and Advice	12150	10660	22810	8	6	14
Community safety projects	20884	0	20884	6		6
Events, Heritage and Arts projects	11550	8395	19945	13	6	19
Projects for disabled people	9600	8660	18260	12	5	17
Education and learning activities	7378	3796	11174	8	3	11
BAME Projects	4800	2700	7500	7	3	10
Projects for older people	2480	1510	3990	3	2	5
COVID specific projects	3530	0	3530	1		1
VE day projects	3240	0	3240	5		5
Not funded	0		0	5		5
Total	183000	70000	253000	160	43	203

23 Projects have been categorised to give an indication of how MAF and AWG funding has been allocated. However, it should be recognised that projects may benefit more than one category. For example, health and wellbeing projects may also support equalities groups, for example, older people or those with disabilities.

oOo

Monitoring of awards made in 2018/19

1 In accordance with the principles determined by the Communities Committee, projects and services supported by Area Wide Grants (AWG) and Member Awarded Funding (MAF) are monitored on an annual basis and results are documented retrospectively in this annual report.

2018/19 Monitoring survey	AWG projects x34	MAF projects x156
Completion rate of monitoring surveys by applicant organisations	88%	92%
Projects completed as planned	74%	90%
Projects that were completed within 12 months	82%	94%
Projects that spent the full amount as planned	82%	94%
How many volunteers were involved with the project?	335	1,576
Number of South Gloucestershire beneficiaries	30,357	240,629

Equalities

2 To ensure equality commitments are upheld, organisations are asked to complete an equality survey. Questions are designed to ascertain if an organisation's primary function is to support individuals on the basis of their protected characteristic. The table below illustrates responses received. Applicants could select more than one characteristic. The results show that 56-58% of funded organisations have 'No specific organisational objectives regarding protected characteristics'. After that the most often ticked characteristics are Age and Disability.

Protected characteristic	AWG responses		MAF responses	
	Number	%	Number	%
Age	3	1%	30	19%
Disability	9	26%	18	12%
Gender reassignment			3	2%
Marriage and civil partnership			2	1%
Pregnancy or maternity			2	1%
Race	1	1%	5	3%
Religion or belief			6	39%
Sex			4	3%
Sexual orientation			1	1%
No specific organisational objectives regarding protected characteristics	13	38%	105	67%

3 As part of the equality survey, organisations were asked about the composition of their management committee, and whether or not the majority identify with one of the nine protected characteristics. The results show that over 64% have 'No specific organisational objectives regarding protected characteristics'.

Management committee by protected characteristic	AWG responses		MAF responses	
	Number	%	Number	%
Age	11	32%	27	17%
Disability	2	1%	2	1%
Gender reassignment				
Marriage and civil partnership				
Pregnancy or maternity				
Race	1	1%	2	1%
Religion or belief	1	1%	11	7%
Sex	1	1%	3	2%
Sexual orientation				
No specific organisational objectives regarding protected characteristics	12	35%	96	62%
