

# English Indices of Deprivation 2019

## South Gloucestershire Priority Neighbourhood Analysis

Produced by:

The Research and Consultation Team

South Gloucestershire Council

November 2019

# Introduction

This report presents summary analysis of the English Indices of Deprivation (ID2019) for the priority neighbourhoods (PNs) in South Gloucestershire. It supplements the overarching report of the ID2019 for South Gloucestershire.

The ID2019 provide a set of relative measures of deprivation for small areas (Lower Super Output Areas) based on seven different domains of deprivation. These domains are then combined to create an overall LSOA level Index of Multiple Deprivation (IMD). The seven domains are:

- Income deprivation
- Employment deprivation
- Education, skills and training deprivation
- Health deprivation and disability
- Crime deprivation
- Barriers to housing and services deprivation
- Living environment deprivation

There are 32,844 LSOAs in England. For the IMD and each of the separate domains a score has been calculated for every LSOA in England. The scores have then been ranked from 1 (most deprived) to 32,844 (least deprived).

South Gloucestershire's priority neighbourhoods have been defined by aggregating LSOAs. Data in this report therefore presents the LSOAs which make up each of the priority neighbourhoods.

## How to interpret data in this report

This report presents key findings for the LSOAs that make-up the priority neighbourhoods in South Gloucestershire. The data in this report is grouped by national deprivation quintiles (NQs). Quintiles are fifths, the 1<sup>st</sup> Quintile (NQ1) being the most deprived 20% of LSOAs in England and the 5<sup>th</sup> Quintile (NQ5) being the least deprived. The following colour classification is used:

Colour	Meaning
	<b>Q1</b> - Most deprived 20% in England
	<b>Q2</b> - Most deprived 20-40% in England
	<b>Q3</b> - Most deprived 40-60% in England
	<b>Q4</b> - Least deprived 20-40% in England
	<b>Q5</b> - Least deprived 20% in England

This report includes the main findings for each priority neighbourhood including comparisons to the ID2015 results.

# Comparison with previous indices – health warnings

The purpose of the ID2019 is to measure as accurately as possible the relative distribution of deprivation at a small area level and this comes at the expense of backwards comparability with previous versions of the indices. The versions of the indices should not be construed as a time-series due to:

- Changes to the data used to construct the indicators, including changes to eligibility criteria
- Revisions to the population denominator data
- Changes to the number of priority neighbourhoods in South Gloucestershire – Filton is no longer classified as a priority neighbourhood

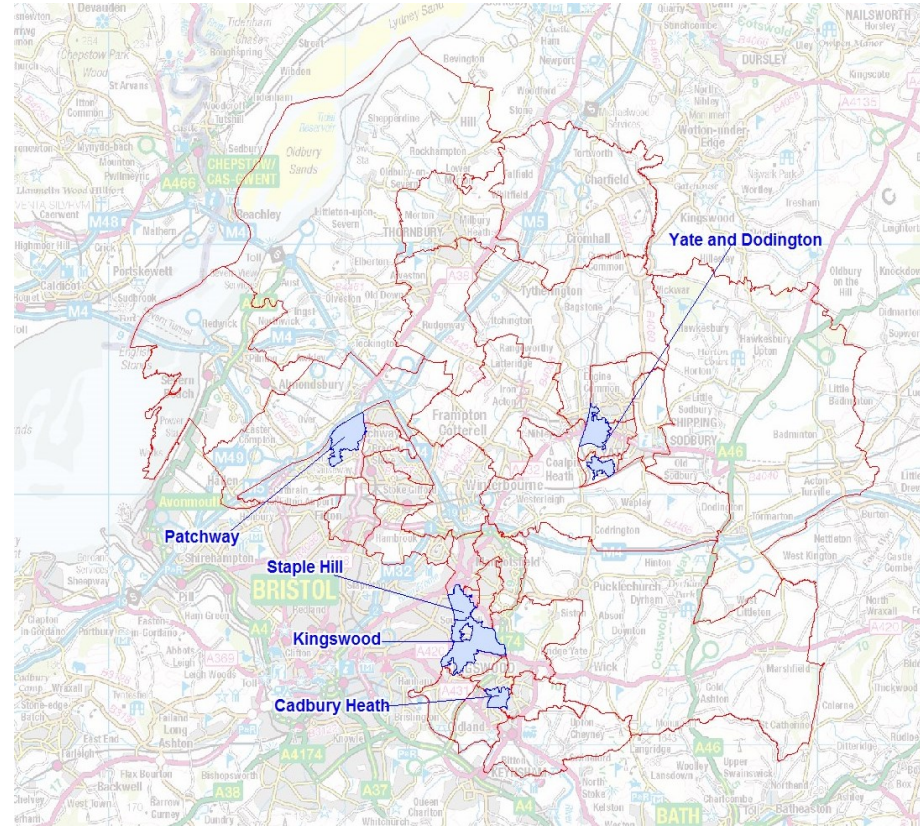

Given these differences, caution should be exercised when making comparisons between the ID 2019 and the ID 2015. It would be valid to state that an area showed an increased level of deprivation, relative to other areas if it was ranked within the most deprived 40% of areas nationally based on the 2015 indices but ranked within the most deprived 20% according to the 2019 indices. However, it would not necessarily be correct to state that the level of deprivation in the area had increased on some absolute scale, as it may be the case that all areas had improved, but that this area had improved more slowly than other areas and so been 'overtaken' by those areas. Similarly, the overall rank of an area may not have changed between the 2015 and 2019 Indices, but this does not mean that there have been no changes to the level of deprivation in the area.

In summary any comparison between ID2019 and previous Indices should be exercised with caution.

This report makes comparison between the ID2019 and ID2015 by analysing changes in LSOAs in terms of their relative national deprivation quintile position.

# Priority Neighbourhood overview: ID 2019

Across South Gloucestershire the highest levels deprivation are generally found within the Council's designated priority neighbourhoods (PNs). In terms of the IMD (the composite index) 13 of the 20 most deprived LSOAs in South Glos. (65%) are located within PNs. This is lower than the figure for 2015 when 90% of the most deprived LSOAs in South Glos. were in priority neighbourhoods, however it should be noted that less areas fall into priority neighbourhoods for the 2019 report as Filton is no longer considered to be a priority neighbourhood.

The pattern for most domains is similar with the majority of the top 20 most deprived LSOAs being within priority neighbourhoods, with the exception of the 'Barriers to housing and services' domain (1 LSOAs within PNs) and the 'Living environment' domain (2 LSOAs within PNs)

## IMD

- Staple Hill PN contains the most deprived LSOA in South Glos. and is the only PN containing an LSOA within the most deprived 20% of LSOAs in England in terms of the IMD
- All LSOAs within the Cadbury Heath and Patchway PNs are within National Quintile 2

# Priority Neighbourhood domains overview: ID 2019

## **Income deprivation:**

- Highest levels of deprivation within are Staple Hill and Kingswood, each with 1 LSOA in the most deprived 20% nationally
- The majority of PN LSOAs fall within the second national quintile for this domain

## **Employment:**

- Highest levels of deprivation within Staple Hill (2 LSOAs in NQ1)
- Patchway and Kingswood PNs both have 1 LSOA in NQ1

## **Education skills & training:**

- This is the domain with the highest levels of deprivation amongst priority neighbourhood LSOAs with 13 PN LSOAs in NQ1
- All of the LSOAs in Patchway and Cadbury Heath are in NQ1

## **Health deprivation and disability:**

- No LSOAs in NQ1 for any PN
- Kingswood, Patchway and Staple Hill all have 1 LSOA in NQ2

## **Crime deprivation:**

- Kingswood is the most deprived in this domain (4 LSOAs in NQ1, 4 in NQ2)
- Lowest levels of deprivation within Yate & Dodington (1 LSOA in NQ5 and 2 LSOAs within NQ4)

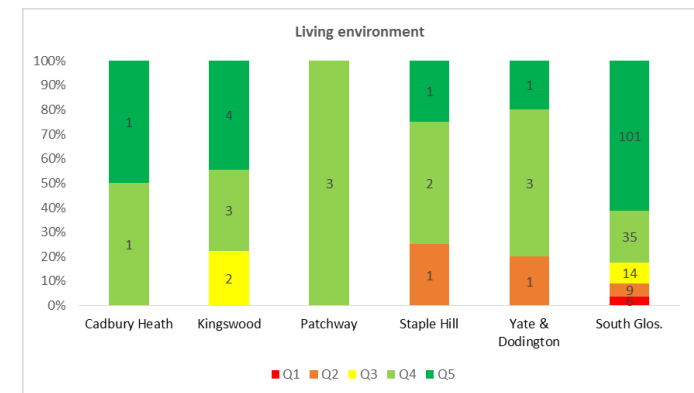

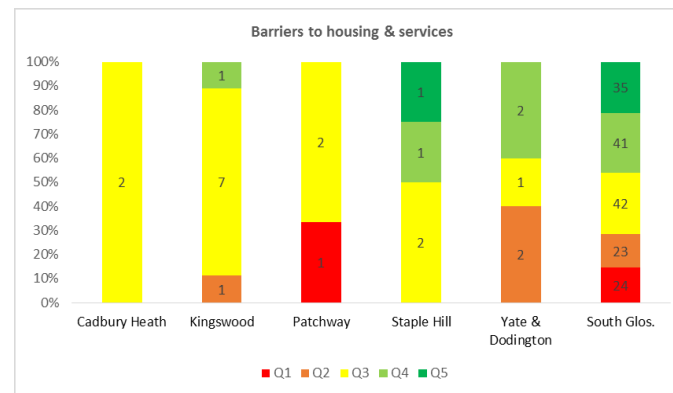

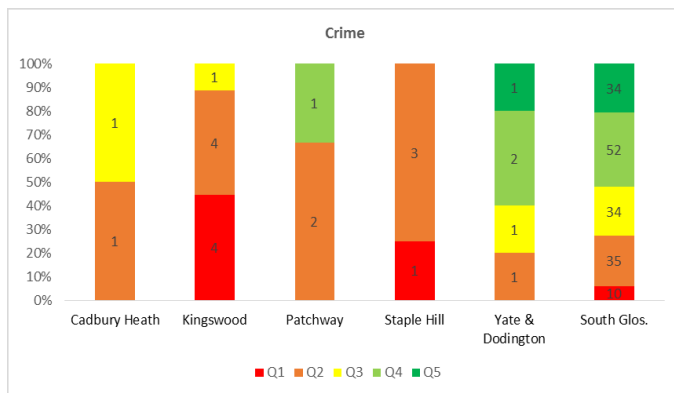

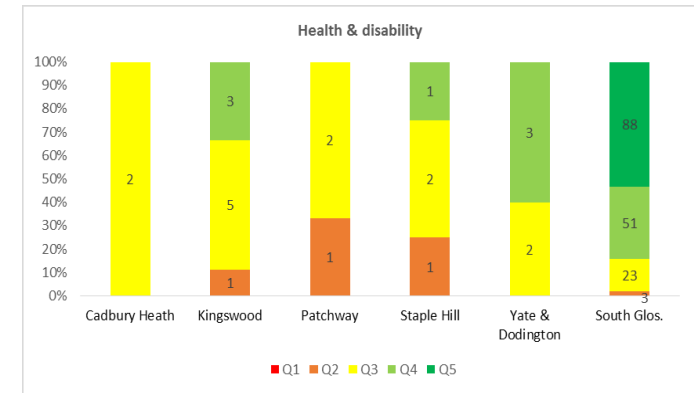

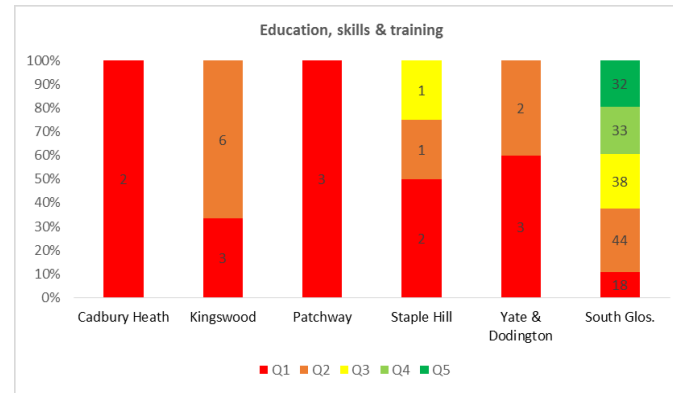

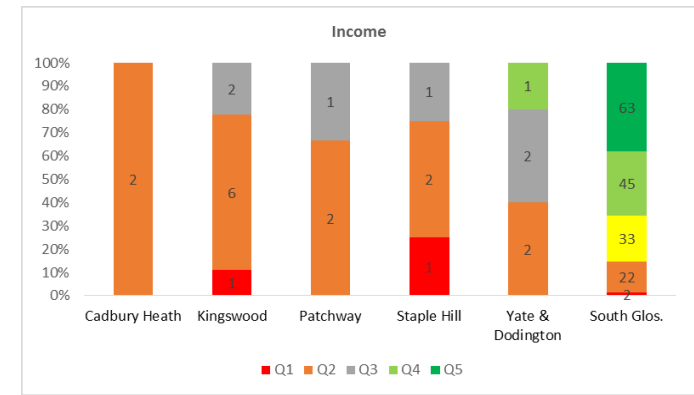

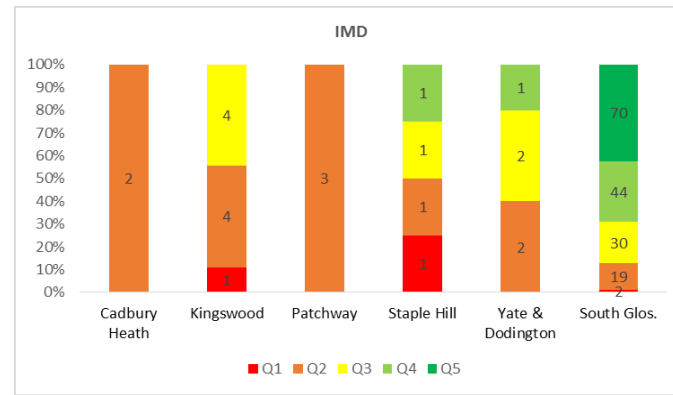

## **Barriers to housing and services deprivation:**

- Patchway is the most deprived PN for this domain with 1 LSOA in NQ1
- Staple Hill is least deprived with 1 LSOA in NQ5 and 1 in NQ4

## **Living environment deprivation:**

- This is the domain with the lowest deprivation for priority neighbourhoods. None of the PN LSOAs are within NQ1
- 7 PN LSOAs for this domain are in NQ5 and the majority are in NQ4

# Distribution of LSOAs within Priority Neighbourhoods by national deprivation quintile – IMD and individual domains

# All PNs: Change 2015-19

## IMD

Since 2015 there has been relatively little change in overall levels of deprivation within the priority neighbourhoods (when measured by the composite IMD). Of the 23 LSOAs which make up the PNs: 87% (20 LSOAs) have not changed NQ position, 4% (1 LSOA) has become more deprived, and 9% (2) have become less deprived.

Kingswood is the only priority neighbourhood containing an LSOA that has become more deprived since 2015. LSOA E01014926, the New Cheltenham road area, has moved from NQ2 into NQ1.

There have been no changes of IMD national quintiles in Cadbury Heath or Patchway.

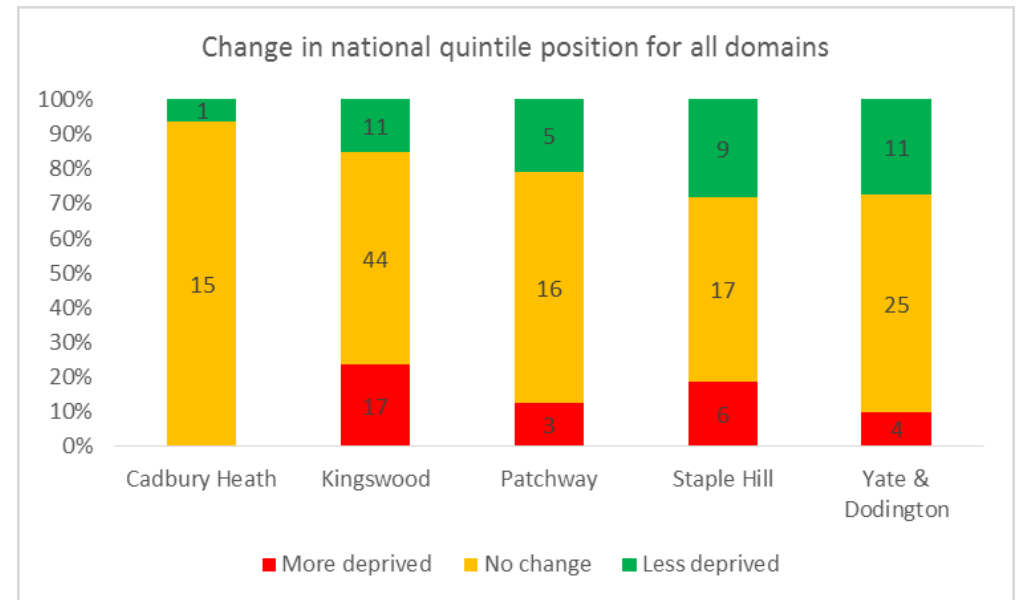

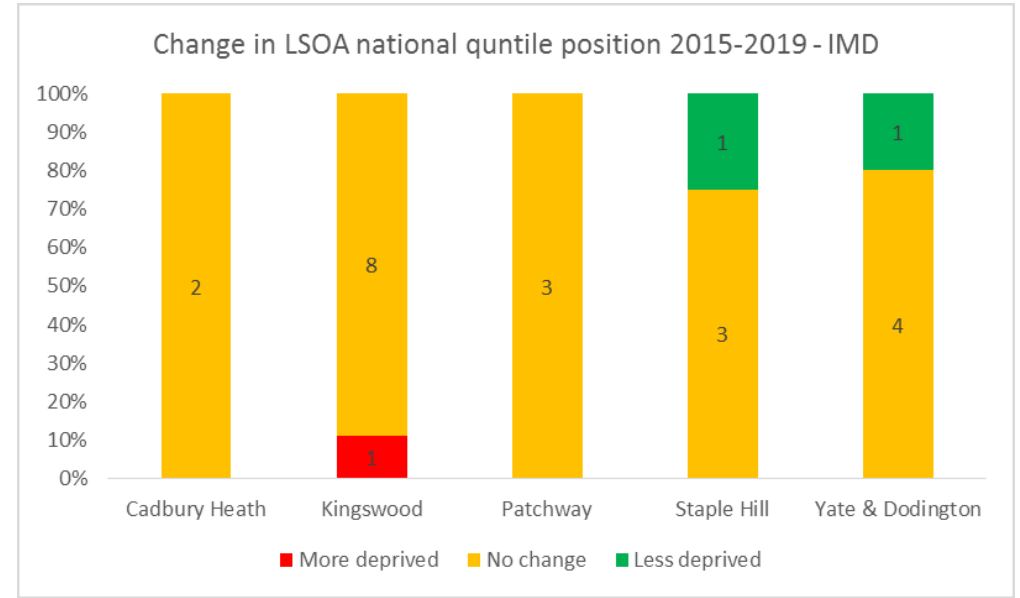

## Domains

Analysis of how individual LSOAs within the PN have changed national quintile position since 2015 in each of the eight domains suggests that 64% (117 LSOAs) have not changed quintile position, 20% (37 LSOAs) have become less deprived and 16% (30 LSOAs) have become more deprived.

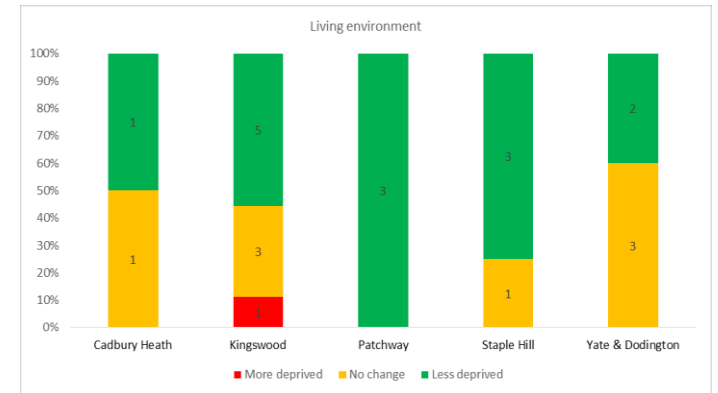

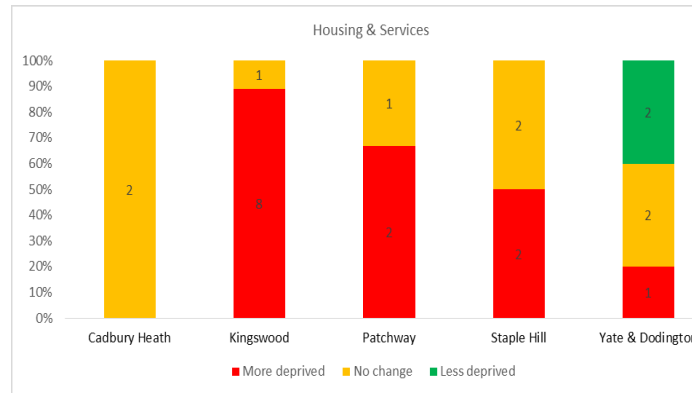

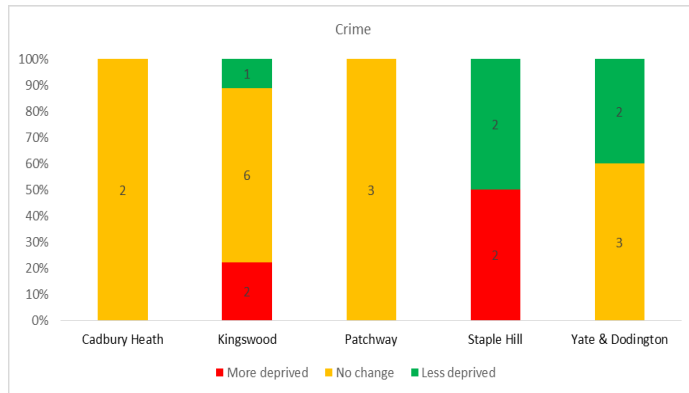

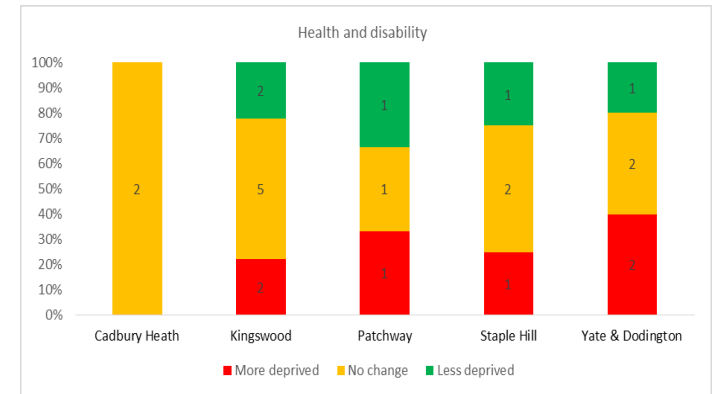

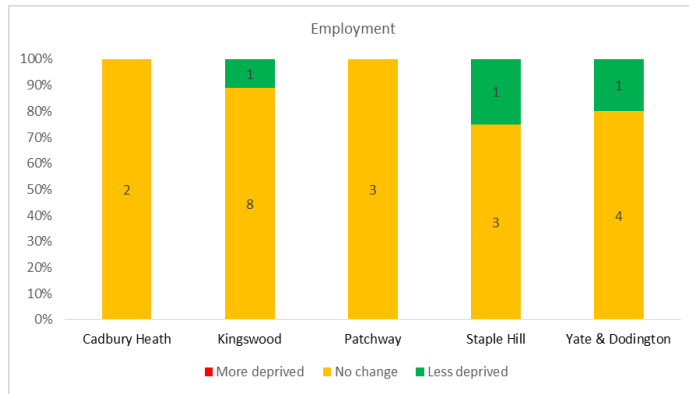

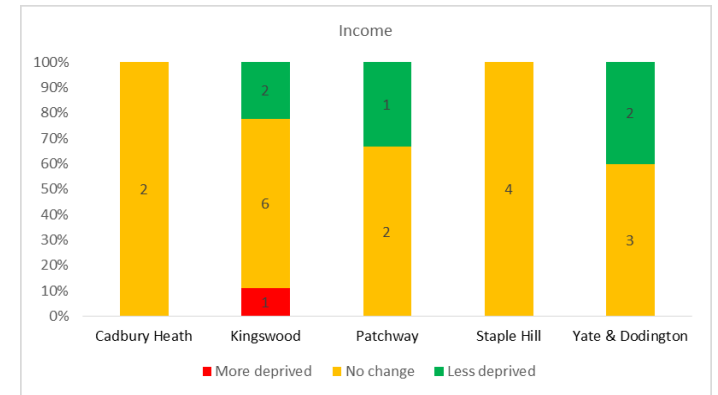

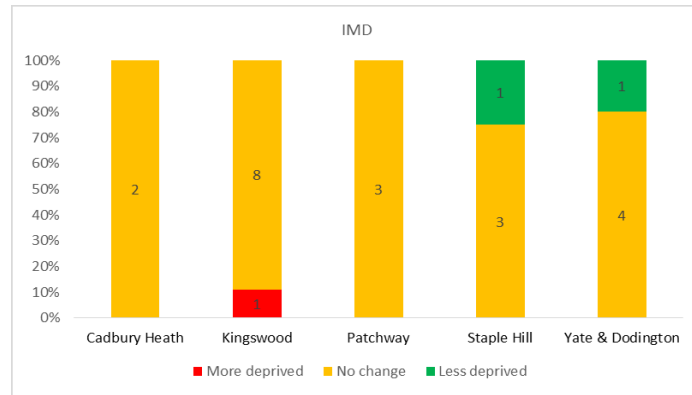

Kingswood is the PN with the largest proportion of LSOAs which have become more deprived across the domains (24%).

Staple Hill is the PN with the largest proportion of LSOAs which have become less deprived across the domains (28%).

More detailed analysis for individual domains by the priority neighbourhoods is provided later in this report.

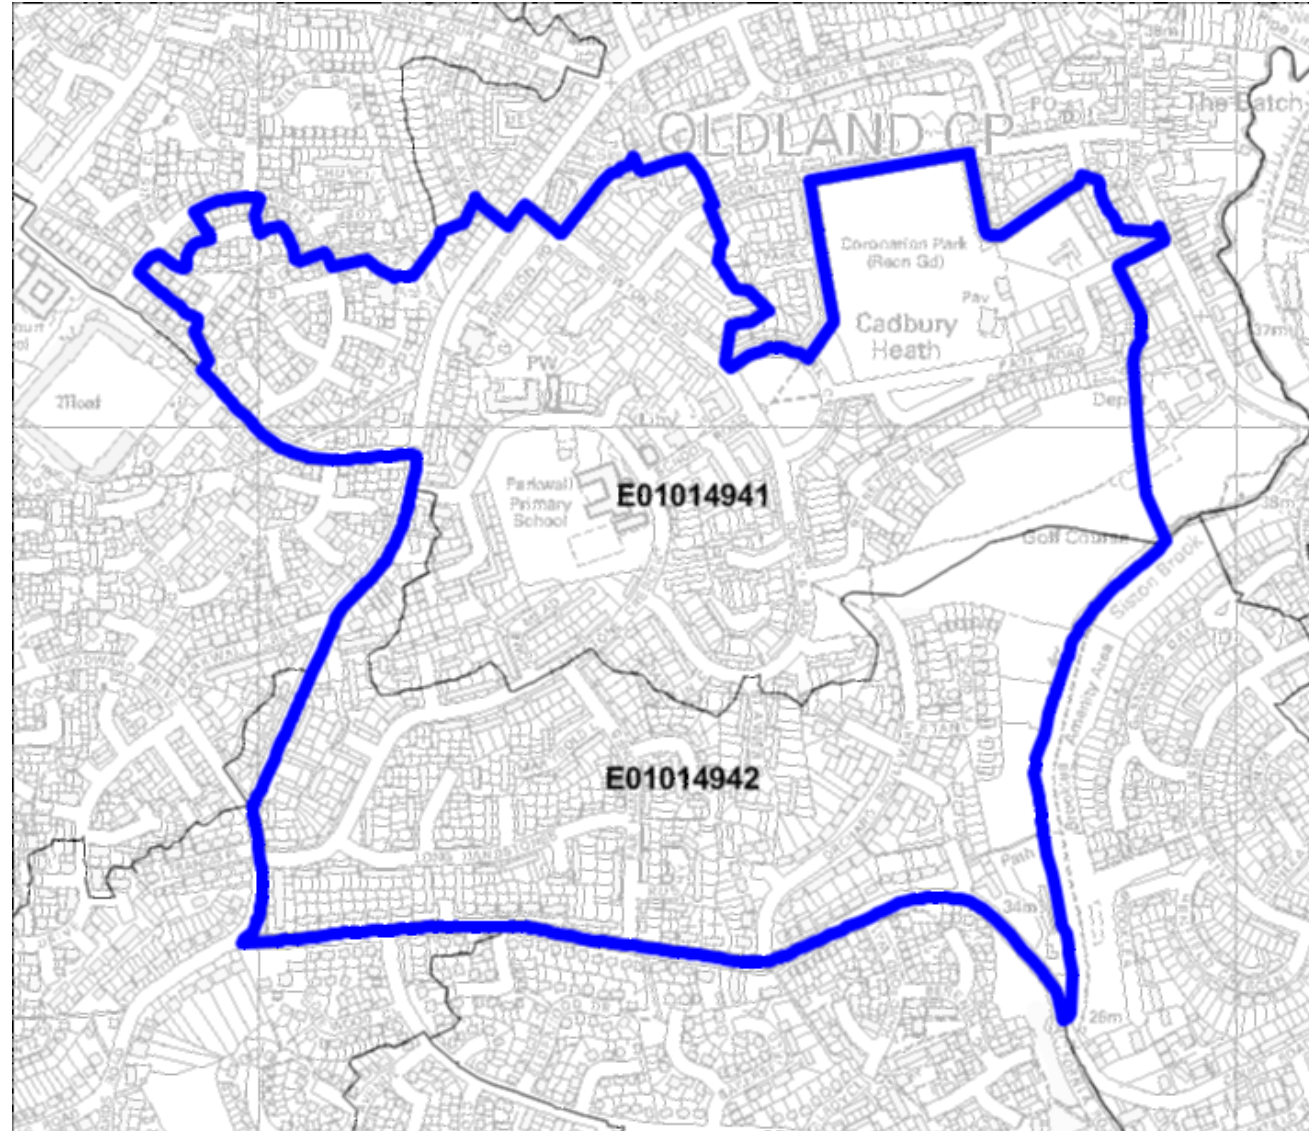

# Changes in the numbers and proportion of LSOAs in Priority Neighbourhoods between national quintile position: ID 2015 - ID 2019

# Cadbury Heath Priority Neighbourhood

Comprises 2 LSOAs  
Resident population (2011 Census): 3,101

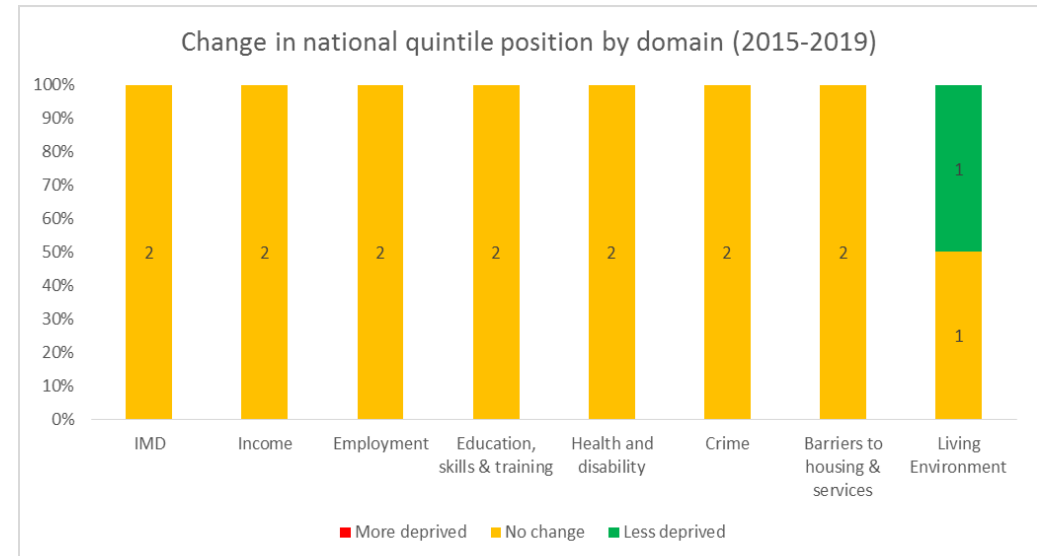

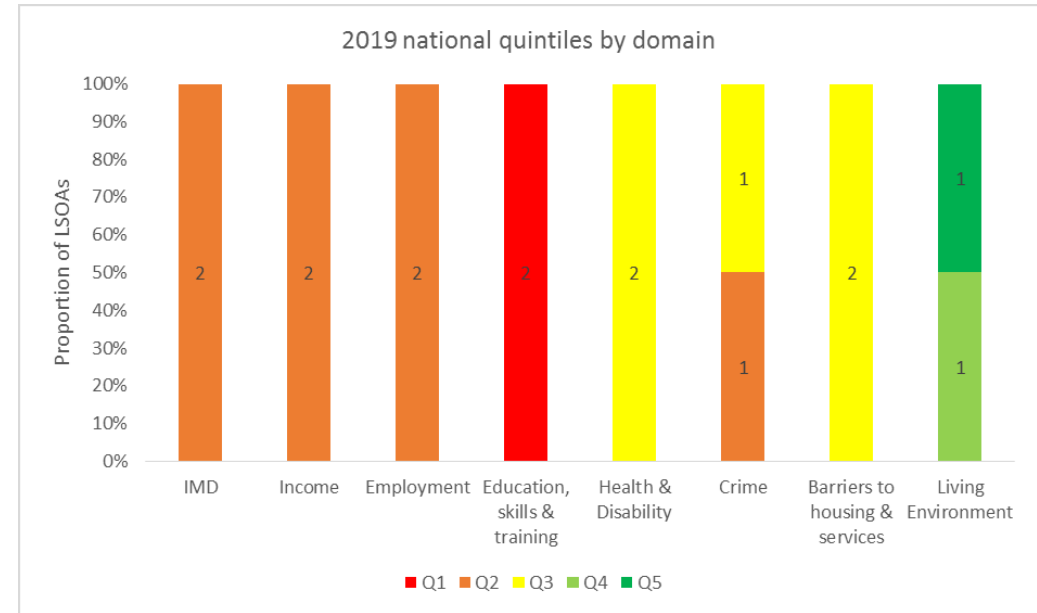

# Cadbury Heath – Key facts

## IMD

- Both LSOAs within the PN are within National Quintile 2 - the same as in ID2015
- In terms of the IMD, the most deprived LSOA within the PN is E01014941 - South of Coronation park area – ranked 8,030<sup>th</sup> nationally. This is the 5<sup>th</sup> most deprived LSOA in South Gloucestershire

## Domains

- The PN is most deprived in terms of Education, Skills & Training deprivation where both LSOAs are within NQ1
- The least deprived domain is Living Environment for which one LSOA is in NQ4 and one in NQ5
- National quintiles remain the same for both LSOAs in all domains except Living Environment in which one domain has risen one national quintile

# Kingswood Priority Neighbourhood

Comprises 9 LSOAs

Resident population (2011 census): 14,538

# Kingswood – Key facts

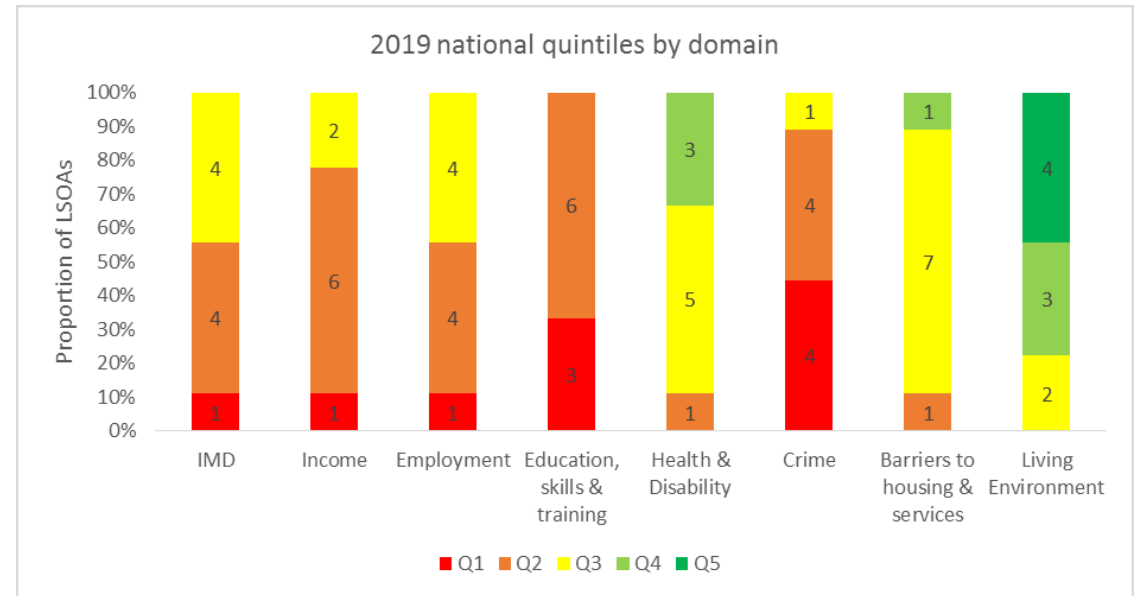

## IMD

- 44% of LSOAs (4) within the PN are within National Quintile 2 and 44% (4) are within NQ3
- E01014926 – the new Cheltenham road area has dropped one national quintile level, now falling into NQ1 for the IMD domain. This is the most deprived area in Kingswood (ranked 2<sup>nd</sup> in South Gloucestershire overall)
- Since ID2015: One of the nine LSOAs within the Priority Neighbourhood has changed national quintile position (E01014926 as outlined above). All other LSOAs in this PN have experienced no change in their national quintile position for the IMD domain since 2015

## Domains

- The PN is most deprived in terms of the crime domain with 4 of the 9 LSOAs (44%) falling into NQ1 for this domain. This is closely followed by Education for which 33% of the LSOAs are in NQ1
- Out of all domains, the most deprived LSOA is E01014926 – the New Cheltenham road area which is in the most deprived 20% nationally for 5 of the 8 domains. It is ranked 2,380<sup>th</sup> nationally in terms of the ‘Education domain’, which is the lowest rank for any LSOA in any domain for Kingswood PN
- All of the domains, except employment, have become relatively more deprived in at least one LSOA since ID 2015
- Since ID2015 some of the biggest increases in deprivation within the PN have been observed in the ‘Barriers to Housing and Services domain’ – where 89% of LSOAs have decreased 1 or more national quintile positions
- Since ID2015 some of the biggest decreases in deprivation within the PN have been observed in the ‘Living environment domain’ – where 56% of LSOAs have increased 1 or more national quintile positions
- Analysis of how individual LSOAs within the PN have changed national quintile position since 2015 in each of the eight domains suggests that 61% of LSOAs have not changed quintile position, 24% have become more deprived and 14% have become less deprived

NB – percentages may not total 100% due to rounding

# Patchway Priority Neighbourhood

Comprises 3 LSOAs

Resident population (2011 Census) : 4,589

# Patchway – Key facts

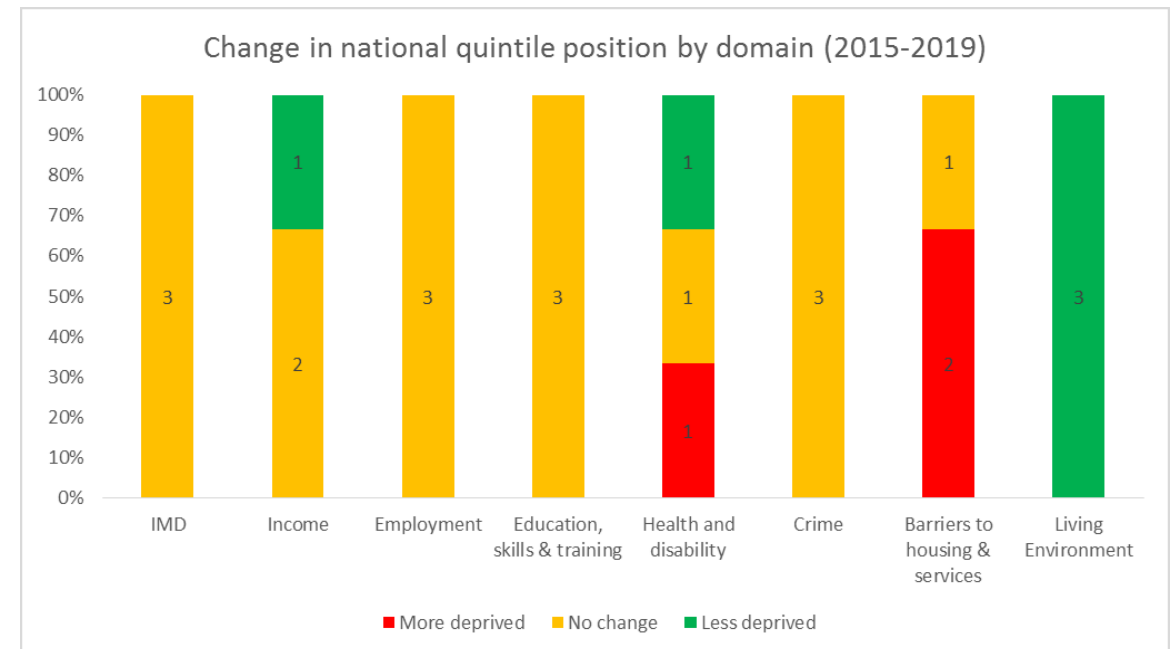

## IMD

- All LSOAs (3) within the PN are within National Quintile 2
- In terms of the IMD the most deprived LSOA within the PN is E01014948 – the Coniston North area - ranked 7,800<sup>th</sup> nationally
- Since ID2015: none of the LSOAs within the PN have changed national quintile position for the IMD domain

## Domains

- The PN is most deprived in terms of the Education Skills & Training domain, where all LSOAs are in NQ1 – the same as ID2015
- Out of all domains, the most deprived LSOA is E01014951 - the Coniston Bradley road area – which is in the most deprived 20% of LSOAs nationally for 2 domains and the most deprived 40% for 4 domains.
- Since ID2015 some of the biggest increases in deprivation within the PN have been observed in the ‘Barriers to Housing and Services domain’ – where two LSOAs have decreased 1 or more national quintile positions
- Since ID2015 the biggest decrease in deprivation within the PN has been observed in the ‘Living Environment’ domain, where all three LSOAs have increased by 1 or more national quintile positions
- Analysis of how individual LSOAs within the PN have changed national quintile position since ID2015 in each of the eight domains suggests that 67% of LSOAs have not changed quintile position, 13% have become more deprived and 21% have become less deprived

NB – Percentages may not total 100 due to rounding

# Staple Hill Priority Neighbourhood

Comprises 4 LSOAs

Resident population (2011 Census): 5,763

# Staple Hill – Key facts

## IMD

- One LSOA within the PN is within National Quintile 1, one is within NQ2, one is within NQ3 and one within NQ4
- In terms of the IMD the most deprived LSOA within the PN is E01014977 – the Pendennis Road area – ranked 4,858<sup>th</sup> nationally. This LSOA is the most deprived area in South Gloucestershire – a position which has not changed since ID2004
- Since ID2015: One of the four LSOAs within the Staple Hill PN has become less deprived, rising one national quintile position (E01014975), and three have seen no change to their national quintile position for the IMD domain.

## Domains

- The PN is most deprived in terms of the Employment and Education domains where two LSOAs are within NQ1.
- Out of all domains, the most deprived LSOA is E01014977 – the Pendennis Road area – which is in the most deprived 20% nationally for five of the eight domains. It is also ranked as the most deprived in South Gloucestershire for three domains.
- Since ID2015: The biggest increase in deprivation within the PN has been observed in the ‘Barriers to Housing and Services’ domain and the ‘Crime’ domain – where two LSOAs have decreased 1 or more national quintile positions.
- Analysis of how individual LSOAs within the PN have changed national quintile position since ID2015 in each of the eight domains suggests that 53% of LSOAs have not changed quintile position, 19% have become more deprived and 28% have become less deprived.

# Yate & Dodington Priority Neighbourhood

Comprises 5 LSOAs  
Resident population (2011 Census): 7,970

# Yate – Key facts

## IMD

- Two LSOAs within the PN are within National Quintile 2, two are within NQ3 and one within NQ4.
- In terms of the IMD the most deprived LSOA within the PN is E01015020 – the Milton Road / Birch Road area - ranked 12,322<sup>nd</sup> nationally.
- Since ID2015: For the IMD domain, 80% of LSOAs (4) within the PN have not changed national quintile position and 1 has increased 1 or more national quintile positions – i.e. become relatively less deprived.

## Domains

- The PN is most deprived in terms of Education, Skills & Training deprivation (3 LSOAs in NQ1).
- Out of all domains, the most deprived LSOAs are E01015020 and E01015011 – which are in the most deprived 20% nationally for one domain and the most deprived 40% for three domains.
- Since ID2015 some of the biggest increases in deprivation within the PN have been observed in the 'Health and disability' domain – where two LSOAs have decreased one or more national quintile positions
- Analysis of how individual LSOAs within the PN have changed national quintile position since 2015 in each of the eight domains suggests that 63% of LSOAs have not changed quintile position, 10% have become more deprived and 27% have become less deprived.
