# Town/District Centres and Retailing in South Gloucestershire: August 2017

## Introduction

This survey provides a comprehensive audit of retailing activity within South Gloucestershire. Included are town centres, district centres, edge of centre and out of centre locations. The Map on Page 6 provides a list and identifies the location of each centre surveyed.

The purpose of undertaking this audit is to monitor the range of retailing activities and the type and composition of shops currently trading. It also provides a basis for monitoring certain defined indicators of retail vitality and viability, and keeps under review local plan policies which aim:

*“To ensure that all residents have a convenient access to a reasonable range and choice of retail, community and service facilities, in a manner which is consistent with the concept of sustainable development.”*

The audit is up-dated by monitoring undertaken in August of each year. Each town/district centre and out of centre location is re-surveyed, recording changes in occupants, function, use class and floorspace. The use classes stated are based on the Town and Country Planning (Use Classes) Order 1987 (as amended) and relate, to the Council's best knowledge, to the most recent use class granted. This survey, however, acts only as a guide to use classes, and it is recommended that a precise check is undertaken on individual units.

## Characteristics of Town/District Centres

### Chipping Sodbury

Chipping Sodbury is characterised as a traditional smaller town/district centre serving mainly the local or "top up" comparison, convenience and service needs of the local community. It has a total of 54 units with an A1 use class providing 2,272 square metres of retail floorspace. The centre maintains the character of an historic market town, but given the proximity of Yate, it lacks the multiples found in other centres. However, it does have an adjacent Waitrose foodstore with a walkway and footbridge linking it to the town centre providing 1,960 square metres of retail floorspace. Comparison shopping forms the majority of retailing activity in the town centre with 37% of units (1,108 square metres) in comparison use. Convenience functions account for 24% of all A1 units totalling 570 square metres. Service functions account for 33% of all A1 units but only 22% of the available A1 floorspace. At the time of the August 2017 survey there were 3 vacant or empty A1 units representing 6% of all A1 retail units in the centre.

### Downend

Downend is characterised as a smaller traditional town/district centre with 29 units with an A1 use class. There is a total of 3,448 square metres of retail floorspace with a Co-Op

foodstore, which, although set back from the primary frontage area, forms the main anchor to the local centre. Supporting this supermarket are a range of comparison, convenience and service retail functions serving the day to day and "top up" needs of the area. The centre, although facing competition from other larger town/district centres and out of centre shopping and foodstores has, in recent years, continued to maintain a range and choice of convenience shopping and local services. The centre continues to display a fairly mixed distribution of retail functions with 31% of all retail units selling comparison goods. However, significantly for this size of centre, 57% of the retail floorspace is taken up by convenience functions, although these only account for 17% of all retail units. At the time of the survey there was 1 vacant or empty A1 unit representing 3% of all A1 retail units within the centre.

### **Emersons Green**

This centre serves the residential development of Emersons Green and provides a diverse range of locally accessible facilities commensurate in scale and function with the nature of the development. Some 6 units front Emerson Way. The anchor store is provided by a Sainsburys foodstore, which is supported by 11 other retail units. At the time of the survey Boots, Poundworld, Pets at Home/Poundland, Peacocks, Sports.Direct.com, Argos and Lidl occupied 7 of these units. The remaining units comprise smaller unit shops, estate agents, a bank, and betting office. There are a total of 11,543 square metres of retail floorspace and at the time of the survey all the units were occupied.

### **Filton**

This centre comprises two older shopping parades and a newer centre, largely completed in early 1999 but with some additions in 2013/2014. In total the centre provides 3,982

square metres of A1 retail floorspace and is supported by leisure and community uses, as well as a Premier Inn hotel. At the time of the August 2017 survey there were 21 units with a reasonable range of comparison, convenience and service retail functions serving the day to day and "top up" needs of the area. Comparison shopping forms the majority of retailing activity in the town centre with 69% of the floorspace totalling 2,731 square metres and 43% of the units. Convenience functions account for 29% of all A1 units totalling 527 square metres, while service functions account for 14% of all A1 units and only 2% of the available A1 floorspace. At the time of the survey there were 3 vacant A1 units.

### **Hanham**

Hanham is characterised as a smaller traditional town/district centre with a total 33 units with an A1 use class. There are a total of 2,271 square metres of retail floorspace including a Lidl supermarket which, although not part of the primary or secondary frontage area, has helped to enhance the attractiveness of the centre by improving the range and quality of facilities available. In addition to the Lidl foodstore, Hanham has a reasonable range of comparison, convenience and service retail functions serving the day to day and "top up" needs of the area. At the time of the August 2017 survey there were 3 vacant or empty A1 units representing 9% of all A1 retail units in the centre, and a 25% fall since the last survey.

### **Kingswood**

Kingswood is a centre providing convenience and low order comparison shopping, together with local service facilities. In total there are 86 units with an A1 use class providing 10,813 square metres of retail floorspace. The centre accommodates a Sainsburys supermarket and an Iceland foodstore, as well as some multiple stores (Boots, WH Smiths, and Wilkinsons). In

addition on the site of a former Co-op foodstore and Pound-Stretcher Extra store which adjoins the centre a Lidl store is under construction which will provide 1,689 square metres of net retail floorspace. Comparison shopping forms the majority of retailing activity in the town/district centre with 45% of units or 6,158 square metres, in comparison use. Convenience functions account for 17% of all A1 units and total 2,969 square metres, while service functions account for 24% of all A1 units or 9% of the available A1 floorspace. At the time of the survey there were 11 vacant or empty A1 units. This represents 13% of all A1 retail units in the town/district centre.

### **Staple Hill**

Staple Hill has a total of 87 units with an A1 use class providing 7,052 square metres of retail floorspace. The centre currently accommodates two foodstores: a Tesco Metro Store, and an Iceland foodstore. Although Staple Hill lacks the range of multiples found in other major town/district centres it has a large number of independent traders offering a range of comparison and convenience shopping serving the local community. Comparison shopping forms the majority of retailing activity in the town centre with 43% of units and 3,064 square metres in comparison use. Convenience functions account for 21% of all A1 units and totals 2,318 square metres, while service functions account for 30% of all A1 units or 16% of the available A1 floorspace. At the time of the survey there were 6 vacant or empty A1 units representing 7% of all A1 retail units in the town/district centre.

### **Thornbury**

Thornbury has a range of mainly small independent shops providing a variety of comparison and convenience functions. An Aldi foodstore provides the main anchor to the centre. Thornbury maintains the character of a market town, despite

the closure of the livestock market in 1997, with a number of gift shops and café/restaurants complementing the other core retailing businesses. In total Thornbury has 72 units with an A1 use class providing 7,191 square metres of retail floorspace. Comparison shopping forms the majority of retailing activity in the centre with 53% of units (3,190 square metres) in comparison use. Convenience functions account for 17% of all A1 units totalling 2,565 square metres. Service functions account for 24% of all A1 units but only 16% of the available A1 floorspace. At the time of the survey there were 5 vacant or empty A1 units representing 7% of all A1 retail units in the town/district centre.

### **Yate**

Yate is characterised as a centre providing substantial amounts of convenience and comparison shopping. The centre comprises a compact pedestrianised town centre together with an adjacent recently completed development comprising a cinema, a range of larger retail units and restaurants. There are a total of 83 units with an A1 use class. A good range of multiple stores are represented, including Poundland, New Look, Dorothy Perkins, Halfords, Argos, Next, TK Maxx and Boots which are supported by a variety of smaller shops. In addition to these functions, the town centre also supports a leisure centre, library, health centres, and a One Stop Shop Council Area Office. Comparison shopping forms the majority of retailing activity with 66% of all A1 units and 56% of the available retail floorspace. Convenience functions account for 33% of retail floorspace but only 10% of all A1 units. The Tesco Extra store accounting for some 79% of all convenience floorspace. Service functions account for 16% of all A1 units but just 4% of retail floorspace. At the time of the survey there were 7 vacant or empty A1 units representing 8% of all A1 retail units in the town/district centre.

Station Road, Yate was included in the survey for the first time in 2010. The occupant and use, together with floorspace (where known) is listed. Station Road provides a total of 20 units (additional to those referred to above) with an A1 use class all of which are occupied.

### **The Willow Brook Centre Bradley Stoke**

This centre serves the residential development of Bradley Stoke and provides a range of large and small retail units together with a complimentary range of services and facilities. The partly under cover centre incorporates an anchor store provided by a Tesco Extra supermarket which is supported by 18 other retail units, with a total A1 use floorspace of 17,448 square meters. At the time of the survey no units were vacant. The units were occupied by well known “high street” names including Carphone Warehouse, Pound World, Shoe Zone, Iceland, Pound Stretcher Extra, Argos and Greggs.

### **Town/District Centres: Survey Content**

Within the individual town/district centre schedules that form the core of this report, every occupant is listed by **address** together with details of their **function** and **use class**. Also included are details of the respective **local plan policies** covering the centre. In addition, a **linear frontage measurement** (in metres) is given for each unit, as well as whether it falls within the **primary or secondary areas of the town centre**, (where this is defined for policy purposes).

Finally, **retail floorspace figures** (net square metres) are given for A1 use class functions. This is sub-divided firstly by occupants that provide a **retail service** rather than goods purchased, then **vacant units** with an A1 use class, and lastly A1 functions that provide a **convenience function**.

The floorspace figures presented (unless otherwise stated), have been collected by South Gloucestershire Council. To the Council's best knowledge they are the most accurate estimates of floorspace in each of town/district centre and out of centre locations.

Listed below are notations used in the town/district centre schedules with their accompanying definitions.

**P** = Primary retailing frontage

**S** = Secondary retailing frontage

**F** = Fringe frontage areas (no linear measurements given)

**LP Policy** = Identifies which local plan policy applies to respective town/district centres. See South Gloucestershire Local Plan January 2006 for information on local plan policies relating to town/district centres.

**All A1 Uses** = Floorspace figures for A1 retail use classes. Figures relate to net retail floorspace (sq.m) which includes the floor area to which customers have access, counter space, checkout space, display areas and fitting rooms.

**A1 Service** = Floorspace figures for outlets where a retail service is provided rather than goods purchased and includes hairdressers, opticians, travel agents, dry cleaners, funeral directors, film processors, photographic studios, shoe repairs, video libraries, electrical and tool hire shops, dress / costume hire shops.

**A1 Vacant** = Floorspace figures for all A1 vacant units in the primary, secondary and fringe retail frontages which, at the time of the survey, had an A1 use class.

**Convenience** = Floorspace figures for those outlets selling food and other perishable goods, including florists, tobacconists, off licences and newsagents.

### **Out of Centre Retailing: Survey Content**

The second part of this audit provides information relating to other retailing facilities outside of the main town/district centres. For the purposes of this survey these include: the Mall Shopping Complex, retail/shopping parks and other out of centre retail stores. Information is provided for each detailing the range of **occupants**, their **function**, **retail floorspace** and the number of **car parking spaces**. Where possible net floorspace data is given, however this is not always known and in some instances an estimated figure is used.

### **Retail Monitoring and Summary Information**

For each town/district centre a summary sheet presents key information outlining the main retailing characteristics of the centre. This summary sheet is comprised of two tables.

**Summary Table 1** highlights the number and percentage of units with an A1 use class which is broken down by function type. i.e. A1 convenience, A1 comparison, and A1 service functions, as well as the number and percentage of vacant A1 units. The corresponding floorspace figures for each category group are also given (if available). From this data, total figures for **the available number of A1 units and floorspace in each centre** is given, as well as the **number of A1 units and floorspace currently occupied and trading** taking into account current vacancy rates.

**Summary Table 2** presents an assessment of the length of A1 frontage in retail use. All town/district centre retail frontages

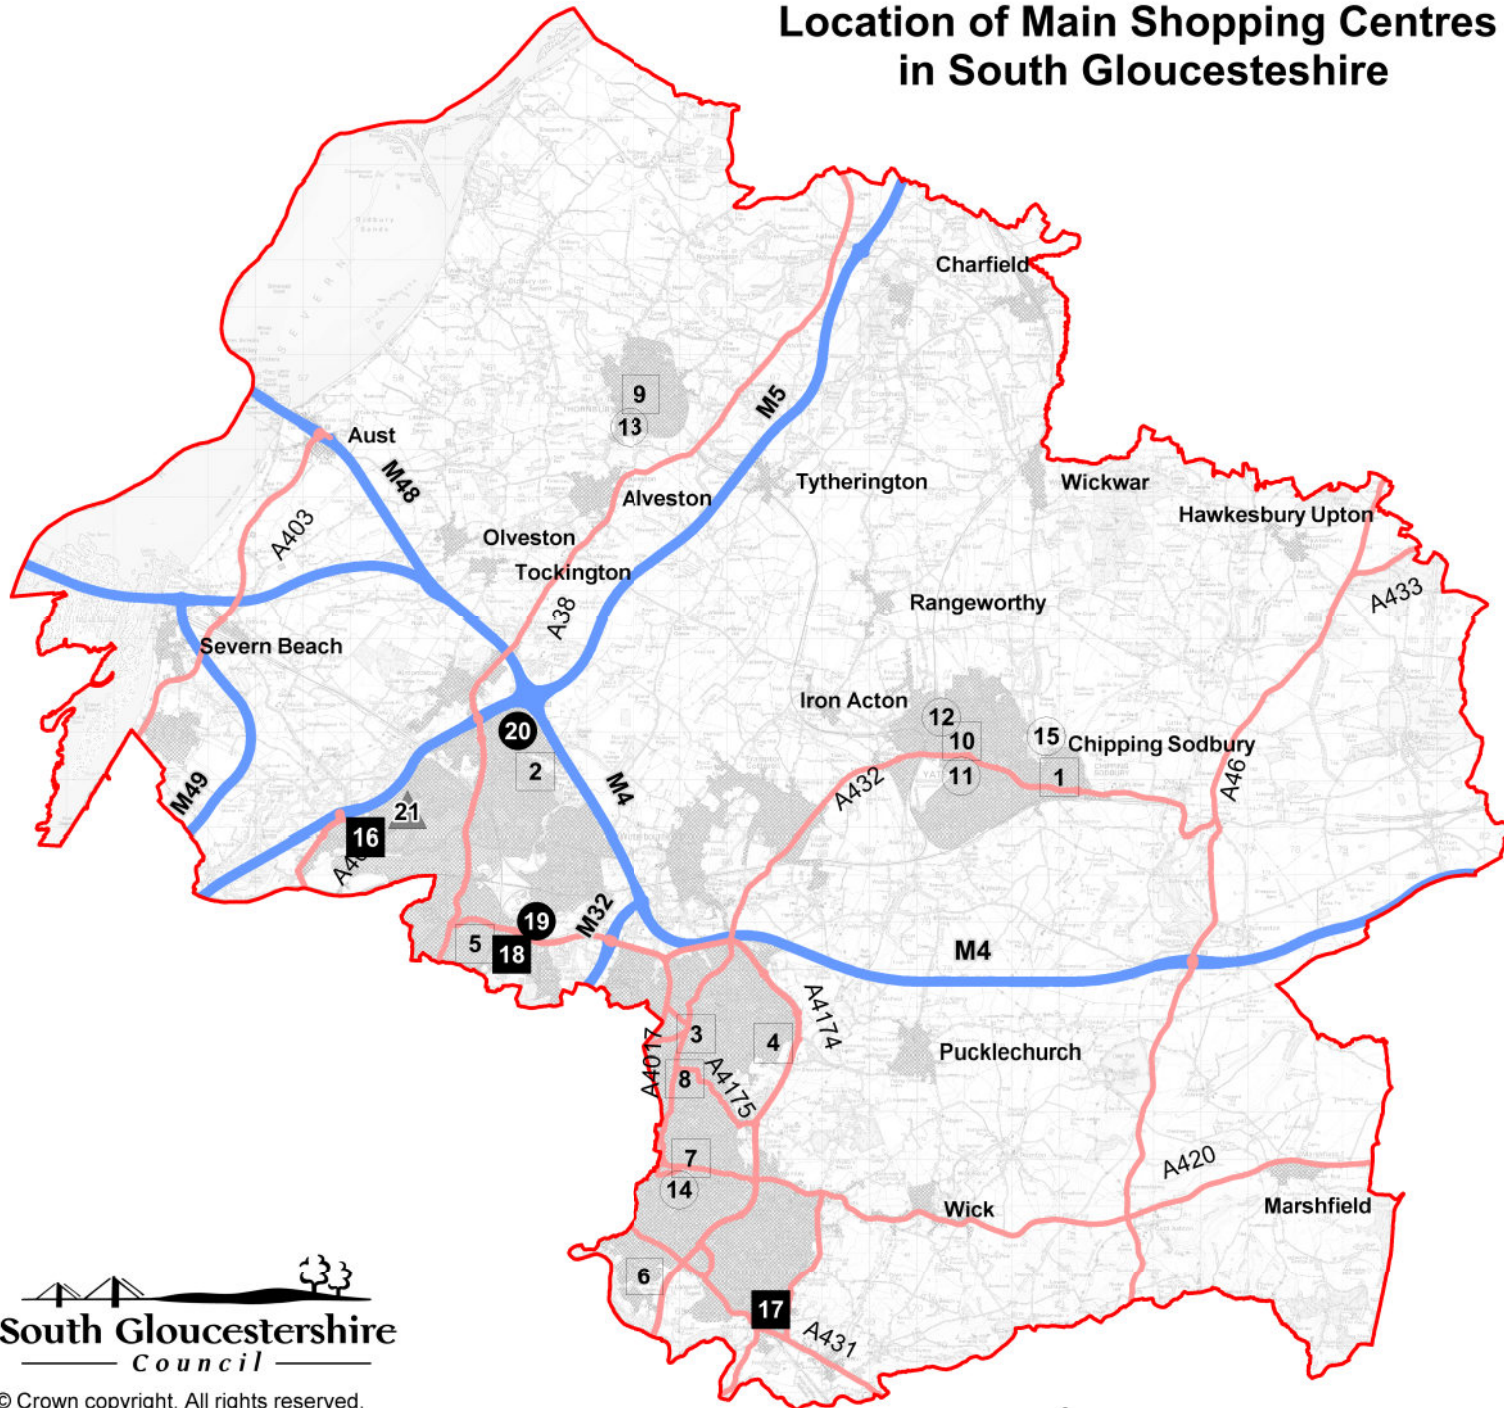

are split between primary and secondary frontages. **Table 2** lists the lengths of individual retail frontages classified as primary frontage for each town/district centre as set out in the South Gloucestershire Local Plan January 2006.

For each section, the total length of primary frontage is given as well as the length of frontage and corresponding percentage currently in A1 use. The length of frontage in non A1 use and its percentage is also given. The same information is similarly displayed for secondary frontage areas although only the total length of secondary frontage is given.

In addition two further tables are included. **Table 1** on Pages 7 and 8 provides an overall summary of **A1 retail** floorspace. Each type of centre is listed showing total available A1 floorspace and the number of A1 units this relates to. This is subsequently broken down by A1 function type to give the floorspace used, number of units and corresponding percentage figures for each.

**Table 2** on Pages 9 and 10 provides an overall summary of the amount of **primary frontage currently in an A1 use class**. Each town/district centre is listed and subsequently broken down into its respective primary frontage areas. The total frontage, length of frontage in A1 use, the percentage, as well as the length of primary frontage not in A1 use and the percentage this represents is displayed. This information allows an overview of how each centre is performing.

# Location of Main Shopping Centres in South Gloucestershire

#### Notes:

\* Excludes Yate, Station Road.

\*\* There are no Net floorspace figures for the Willow Brook Centre, Bradley Stoke the figures shown are therefore Gross.

\*\*\* At time of survey demolition had been completed and construction underway for new Lidl store PK15/5213/F (1,689 sq m Net floorspace)

\*\*\*\* The convenience floorspace measurement for Longwell Green only relates to the Asda Store however part of the M&S store is a foodhall.

\*\*\*\*\* The convenience floorspace measurement for Abbey Wood only relates to the Asda Store however part of the B&M store has a food section.

\*\*\*\*\* Floorspace figures for The Mall relate to the gross internal area (GIA). This measurement of floorspace is comparable with net floorspace figures quoted for other centres.

The Council makes every effort to ensure the accuracy of the floorspace data presented which is to the Council's best knowledge the most accurate and up to date figures available.
